Childbirth in South Asia: Old Challenges and New Paradoxes (New Delhi: Oxford University Press)
Childbirth in South Asia: Old Challenges, New Paradoxes is a sweeping overview of recent critical research on the transformations in the experience, management, and policymaking processes of maternal health in South Asia. This volume is the first of its kind to bring together interdisciplinary work on childbirth by anthropologists, sociologists, historians and public health experts working across the region. Exploring reproductive care from the vantage point of mothers (or mothers-to-be) and families, a wide range of medical practitioners, and policymakers, the accessible chapters in this book elucidate enduring and novel challenges to providing humane high quality reproductive care in this rapidly changing and diverse part of the world in the early 21st century.

(Cecilia C. Van Hollen, Professor of Anthropology, Yale-NUS College).

- Dr Clémence Jullien, CNRS research fellow, Center for South Asian Studies (CEIAS-EHESS/CNRS)
